Entrol opens a new Maintenance Center in Denver, Colorado

This expansion has been performed in collaboration with Sunny Communications, who has provided Entrol's team with part of the facilities and equipment required.

The maintenance center opening hours are Monday to Friday from 9:00 to 17:00 (GMT -7), adding to the opening hours of Entrol Madrid Headquarters that go from 9:00 to 17:00 (GMT+1).

This new maintenance center will also include Entrol's US showroom, featuring Sunny Communications' Entrol H11 FTD Level 5 simulator, based on the EC135.

From this maintenance center, Entrol's experienced personnel, formed in Entrol's base in Madrid, solves and coordinates possible bugs, offers remote and telephonic maintenance support and delivers spares for US timezone customers.

"With this new US based maintenance center we want to fulfill the needs of the American market with the efficiency expected from an US based corporation. We believe this is the next logic step to increase our presence in the American continent and continue the growth Entrol has been experiencing. Entrol is fully committed to maintaining a quality service after the sale of the equipment", states Luis Olarte, CEO and Co-Founder of Entrol.
